

ISO 22301 BUSINESS CONTINUITY MANAGEMENT SYSTEM CERTIFICATION

REDUCE THE IMPACTS OF INCIDENTS AND ENSURE BUSINESS CONTINUITY WITH THE ISO 22301 CERTIFICATION

Every organization nowadays needs to be secured towards disruptions, incidents and inside & outside threats. For this reason, the ISO 22301 Business Continuity standard has been developed to protect companies against threats, reduce the likelihood of, and ensure your business recovers from disruptive incidents.

An effective business continuity management system (BCMS) certification will help your organization to develop and maintain a best practice approach to respond effectively to any disruption, by implementing continuous improvement tools and techniques.

BENEFITS OF ISO 22301 CERTIFICATION TO YOUR ORGANIZATION:

- Establishing a framework to identify, reduce, and manage threats for your organization
- Increases organizational productivity with “Plan, Do, Check, Act” best practice approach
- Demonstrated compliance with customer, regulatory and/or other requirements
- Decreases the internal and external business continuity audit costs
- Improve incident response time and minimize the threats
- Gains competitive advantage with an internationally acknowledged standard
- Increases client confidence and demonstrate resilience
- Provides continual assessment and improvement
- Identifies and encourages more efficient and time saving processes
- Improves your risk profile with clients, investors and stakeholders

BENEFITS OF ISO 22301 CERTIFICATION TO YOUR CUSTOMERS:

- Improved service and security
- Increased confidentiality
- Regulated legal compliance
- Fewer incidents and damages
- Top client delivery levels

UNDERSTANDING THE CERTIFICATION PROCESS

ISO 22301 certification (also known as “registration”) is granted by a third-party (accredited company), upon verifying through an audit that the organization is in compliance with the requirements of the ISO 22301 standard. This certification is then maintained through scheduled annual surveillance audits by the registrar, with re-certification of the Quality Management System performed on a triannual basis.

- Step 1. Pre-Audit (Optional)- It must be done at least 3 months before Certification Audit
- Step 2. Audit Plan - Plan for audit has to be mutually agreed
- Step 3. Audit Stage 1 & 2 - Non-conformities must be closed at least 3 months after audit conclusions
- Step 4. Initial Certification - Certificate will be issued within 2 weeks after successful audit closing

Once certification has been obtained, the organization will be subjected to two surveillance audits within 24 months from the initial certification:

- Surveillance Audit Stage 1 - No longer than 12 months from the initial certification audit
- Surveillance Audit Stage 2 - No longer than 12 months from the 1st surveillance audit

WHY CHOOSE NETHOST?

NetHost provides certification for persons, management systems, and products on a wide range of international standards. As a global provider of training, examination, audit, and certification services, NetHost offers its expertise on multiple fields, including but not limited to Business Continuity.

We help organizations to show commitment and competence with internationally recognized standards by providing this assurance through the education, evaluation and certification against rigorous, internationally recognized competence requirements. With a global coverage of more than 700 partners in over 150 countries worldwide, our mission is to provide our clients comprehensive services that inspire trust, continual improvement, demonstrate recognition, and benefit society as a whole.
